2019 - 2021

Manila City, Philippines

Projects

ConnectGreen | React, TailwindCSS, Node.js, MongoDB, Express.js, Flutter

- Built a full-stack website using MERN and mobile application using Flutter connecting the users with their community focused on zero waste initiatives.
- Developed a descriptive analytics admin dashboard for a streamlined data summarization and interpretation.
- Features a pick-up appointment system for waste pick-up and an ecommerce platform for users to buy and sell fertilizers made from wastes picked up.
- Uses a real-time tracking system using Mapbox API to track the location of the pick-up vehicles and their routes.

GreenConnect | React, TailwindCSS, Node.js, Express.js, MongoDB

- Developed a full-stack ecommerce website using MERN stack based on my ConnectGreen projects which only has an ecommerce mobile application.
- Implemented a role-based access to some pages for buyers, sellers, and admin with admin dashboards, shopping carts.
- Frontend built on React, Express.js for Backend, TailwindCSS for styling, and MongoDB for Database.
